

## Special Issue

# Investigation of Duplex Stainless Steel

### Message from the Guest Editor

Papers are also invited in the field of additive manufacturing, especially wire and arc additive manufacturing, as numerous phase transformations can occur in DSS whose circumstances have not yet been extensively researched. Manuscripts dealing with the determination of the processability (e.g., via machining, forming, welding, etc.) of newly developed DSS grades are also encouraged. Submitted papers should establish a correlation between microstructure and mechanical and/or corrosion properties with an emphasis on possible industrial uses.

## About the Journal

### Message from the Editor-in-Chief

Welcome to *Crystals*, the journal dedicated to the fascinating world of crystallographic research! Crystals are more than mere decorative elements; they hold the key to understanding the fundamental structure of matter. Our mission is to explore the crucial significance of this research across various fields. From medicine to technology, chemistry to geology, crystals play a vital role. Their structure provides insights into new advanced materials, innovative drugs, and groundbreaking technologies. Through *Crystals*, we delve into the microscopic world to discover solutions that will shape the future. Join us on a journey through the *Crystals*, where science merges with beauty and innovation.

### Author Benefits

#### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), Inspec, Ei Compendex, CAPlus / SciFinder, and other databases.

#### Journal Rank:

JCR - Q2 (Crystallography) / CiteScore - Q2 (Condensed Matter Physics)
