

Special Issue

Kinetic Processes of Crystal Growth

Message from the Guest Editor

The aim of this Special Issue, "**Kinetic Processes of Crystal Growth**", is to give an overview of the research of the kinetics of fundamental processes of precipitation, but also of the applied investigations of crystallization kinetics relevant in many different fields and model systems of different complexity. Indeed, the authors are encouraged to contribute papers detailing their experimental and theoretical results.

- Precipitation
- Crystal growth kinetic
- Crystal growth mechanism
- Nucleation
- Aging
- Non-classical crystallization
- Polymorphism
- Metastable solids

About the Journal

Message from the Editor-in-Chief

Welcome to *Crystals*, the journal dedicated to the fascinating world of crystallographic research! Crystals are more than mere decorative elements; they hold the key to understanding the fundamental structure of matter. Our mission is to explore the crucial significance of this research across various fields. From medicine to technology, chemistry to geology, crystals play a vital role. Their structure provides insights into new advanced materials, innovative drugs, and groundbreaking technologies. Through *Crystals*, we delve into the microscopic world to discover solutions that will shape the future. Join us on a journey through the *Crystals*, where science merges with beauty and innovation.

Editor-in-Chief

Prof. Dr. Alessandra Toncelli

Department of Physics, University of Pisa, 56126 Pisa, PI, Italy

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), Inspec, Ei Compendex, CAPus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Crystallography) / CiteScore - Q2 (Condensed Matter Physics)
