

# Special Issue

## Processing of Stainless Steels

### Message from the Guest Editor

This Special Issue is dedicated to the processing of stainless steels, from forming and heat treatment to the final finish. The process of stainless steel production involves various operations that change the microstructure and properties of stainless steels, and all of these steps are crucial for achieving the final properties. The Special Issue addresses microstructural evolution during thermal and mechanical treatment, the relationship between microstructure and properties, and the influence of different processing techniques on the microstructure.

## About the Journal

### Message from the Editor-in-Chief

Welcome to *Crystals*, the journal dedicated to the fascinating world of crystallographic research! Crystals are more than mere decorative elements; they hold the key to understanding the fundamental structure of matter. Our mission is to explore the crucial significance of this research across various fields. From medicine to technology, chemistry to geology, crystals play a vital role. Their structure provides insights into new advanced materials, innovative drugs, and groundbreaking technologies. Through *Crystals*, we delve into the microscopic world to discover solutions that will shape the future. Join us on a journey through the *Crystals*, where science merges with beauty and innovation.

### Author Benefits

#### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), Inspec, Ei Compendex, CAPus / SciFinder, and other databases.

#### Journal Rank:

JCR - Q2 (Crystallography) / CiteScore - Q2 (Condensed Matter Physics)
