

Special Issue

Properties and Applications of Novel Light Metal Hydrides

Message from the Guest Editors

The Special Issue on “Properties and Applications of Novel Light Metal Hydrides” is intended to provide a unique international forum aimed at covering a broad description of results involving essential hydrides synthesis, characterization and study of properties, as well as various applications. Scientists working in a wide range of disciplines are invited to contribute to this cause. The topics summarized under the keywords broadly cover examples of the greater number of sub-topics in mind. This volume is especially open for any innovative contributions involving crystal design aspect.

- Hydrogen storage
- Solid electrolytes
- Magnetism
- High pressures
- Superconductivity
- Crystal structure

Guest Editors

Prof. Dr. Radovan Cerny

Université de Genève, Department of Quantum Matter Physics,
Genève, Switzerland

Prof. Dr. Yaroslav Filinchuk

Institute of Condensed Matter and Nanosciences, Université
Catholique de Louvain, Louvain-la-Neuve, Belgium

Deadline for manuscript submissions

closed (20 March 2018)

About the Journal

Message from the Editor-in-Chief

Welcome to *Crystals*, the journal dedicated to the fascinating world of crystallographic research! Crystals are more than mere decorative elements; they hold the key to understanding the fundamental structure of matter. Our mission is to explore the crucial significance of this research across various fields. From medicine to technology, chemistry to geology, crystals play a vital role. Their structure provides insights into new advanced materials, innovative drugs, and groundbreaking technologies. Through *Crystals*, we delve into the microscopic world to discover solutions that will shape the future. Join us on a journey through the *Crystals*, where science merges with beauty and innovation.

Editor-in-Chief

Prof. Dr. Alessandra Toncelli

Department of Physics, University of Pisa, 56126 Pisa, PI, Italy

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), Inspec, Ei Compendex, CAPus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Crystallography) / CiteScore - Q2 (Condensed Matter Physics)
