

Special Issue

Design, Synthesis, and Characterization of Graphene Quantum Dots

Message from the Guest Editors

Graphene quantum dots, which are zero-dimensional graphene nanostructures, have attracted significant attention due to their unique properties and potential applications in various fields, including optoelectronics, energy storage, biomedicine, and catalysis. The Special Issue on "Design, Synthesis, and Characterization of Graphene Quantum Dots" aims to provide a comprehensive platform for researchers, scientists, and engineers to share their cutting-edge research, methodologies, and findings related to GQDs.

Guest Editors

Dr. Aumber Abbas

Dr. Qurat ul ain Zahra

About the Journal

Message from the Editor-in-Chief

Welcome to *Crystals*, the journal dedicated to the fascinating world of crystallographic research! Crystals are more than mere decorative elements; they hold the key to understanding the fundamental structure of matter. Our mission is to explore the crucial significance of this research across various fields. From medicine to technology, chemistry to geology, crystals play a vital role. Their structure provides insights into new advanced materials, innovative drugs, and groundbreaking technologies. Through *Crystals*, we delve into the microscopic world to discover solutions that will shape the future. Join us on a journey through the *Crystals*, where science merges with beauty and innovation.

Editor-in-Chief

Prof. Dr. Alessandra Toncelli

Department of Physics, University of Pisa, 56126 Pisa, PI, Italy

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), Inspec, Ei Compendex, CAPus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Crystallography) / CiteScore - Q2 (Condensed Matter Physics)
