

Special Issue

Pattern Formation and Defects in Liquid Crystals

Message from the Guest Editor

We invite investigators to submit papers that focus on the generation and dynamics of defects or patterns in liquid crystals, either from an experimental, theoretical, or numerical perspective. The focus may be application-oriented or basic science, and the reported systems may be in equilibrium or non-equilibrium. Materials may be thermotropic, lyotropic, colloidal, or even biomaterials, as long as they feature long-range orientational order that allows to define defects and patterns.

Deadline for manuscript submissions

About the Journal

Message from the Editor-in-Chief

Welcome to *Crystals*, the journal dedicated to the fascinating world of crystallographic research! Crystals are more than mere decorative elements; they hold the key to understanding the fundamental structure of matter. Our mission is to explore the crucial significance of this research across various fields. From medicine to technology, chemistry to geology, crystals play a vital role. Their structure provides insights into new advanced materials, innovative drugs, and groundbreaking technologies. Through *Crystals*, we delve into the microscopic world to discover solutions that will shape the future. Join us on a journey through the *Crystals*, where science merges with beauty and innovation.

Editor-in-Chief

Department of Physics, University of Pisa, 56126 Pisa, PI, Italy

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), Inspec, Ei Compendex, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Crystallography) / CiteScore - Q2 (Condensed Matter Physics)
