

## Special Issue

# Crystals, Films and Nanocomposite Scintillators

### Message from the Guest Editors

In this Special Issue, we aim to introduce and describe, in more detail, the current status in terms of research and development in bulk, ceramic, film, and nanocomposite scintillators, prepared using different technological methods. Both technological descriptions and the various characterization aspects of scintillation materials, together with application aspects in the above mentioned fields, will be provided.

Prof. Yuriy Malyukin

## About the Journal

### Message from the Editor-in-Chief

Welcome to *Crystals*, the journal dedicated to the fascinating world of crystallographic research! Crystals are more than mere decorative elements; they hold the key to understanding the fundamental structure of matter. Our mission is to explore the crucial significance of this research across various fields. From medicine to technology, chemistry to geology, crystals play a vital role. Their structure provides insights into new advanced materials, innovative drugs, and groundbreaking technologies. Through *Crystals*, we delve into the microscopic world to discover solutions that will shape the future. Join us on a journey through the *Crystals*, where science merges with beauty and innovation.

### Author Benefits

#### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), Inspec, Ei Compendex, CAPlus / SciFinder, and other databases.

#### Journal Rank:

JCR - Q2 (Crystallography) / CiteScore - Q2 (Condensed Matter Physics)
