

Special Issue

Advances in Structural and Compositional Characterization for the Development of Wide Bandgap Semiconductors

Message from the Guest Editors

The objective of this Special Issue is therefore to highlight the importance of structural and compositional characterisation for the development of novel WBGS structures and devices and to give a series of representative examples of how advanced structural and compositional characterisation can help to control the desired properties and functions of materials and devices.

Guest Editors

Prof. Dr. Katharina Lorenz

Tecnologias Nucleares e Protecção Radiológica; Departamento de Engenharia e Ciências Nucleares

Dr. Andrés Redondo-Cubero

Department of Applied Physics, Universidad Autónoma de Madrid, E-28049 Madrid, Spain

Deadline for manuscript submissions

About the Journal

Message from the Editor-in-Chief

Welcome to *Crystals*, the journal dedicated to the fascinating world of crystallographic research! Crystals are more than mere decorative elements; they hold the key to understanding the fundamental structure of matter. Our mission is to explore the crucial significance of this research across various fields. From medicine to technology, chemistry to geology, crystals play a vital role. Their structure provides insights into new advanced materials, innovative drugs, and groundbreaking technologies. Through *Crystals*, we delve into the microscopic world to discover solutions that will shape the future. Join us on a journey through the *Crystals*, where science merges with beauty and innovation.

Editor-in-Chief

Prof. Dr. Alessandra Toncelli

Department of Physics, University of Pisa, 56126 Pisa, PI, Italy

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), Inspec, Ei Compendex, CAPus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Crystallography) / CiteScore - Q2 (Condensed Matter Physics)
