Special Issue

Recent Advances in the Mechanical Properties of Fiber Composite Materials

Message from the Guest Editors

Fiber composites are versatile advanced materials that are employed in a wide range of advanced applications due to their excellent properties, such as a short production time, long-term cost savings, light weight and high durability. This Special Issue of *Crystals* is dedicated to the latest research advances in fiber composite materials and their mechanical properties. We encourage the submission of papers that address issues at the frontier of research and the application of composites in various fields. Topics for this Special Issue include, but are not limited to, the durability and mechanical properties of fiber composites; composites made from different types of fibers, including recycled and natural fibres; composites containing nanomaterials and biocomposites; composite components; the modification of composites; the long-term performance of composites; fire protection of composites; various forming and processing methods; and the application of composites. Original articles and reviews are welcome.

About the Journal

Message from the Editor-in-Chief

Welcome to *Crystals*, the journal dedicated to the fascinating world of crystallographic research! Crystals are more than mere decorative elements; they hold the key to understanding the fundamental structure of matter. Our mission is to explore the crucial significance of this research across various fields. From medicine to technology, chemistry to geology, crystals play a vital role. Their structure provides insights into new advanced materials, innovative drugs, and groundbreaking technologies. Through *Crystals*, we delve into the microscopic world to discover solutions that will shape the future. Join us on a journey through the *Crystals*, where science merges with beauty and innovation.

Editor-in-Chief

Prof. Dr. Alessandra Toncelli
Department of Physics, University of Pisa, 56126 Pisa, PI, Italy

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), Inspec, Ei Compendex, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Crystallography) / CiteScore - Q2 (Condensed Matter Physics)
