Special Issue

Feature Papers in Biomolecular Crystals in 2022-2023

Message from the Guest Editors

The journal Crystals (ISSN: 2073-4352) is pleased to announce the launch of a Special Issue titled “Feature Papers in Biomolecular Crystallography in 2022”.

The Biomolecular Crystallography section facilitates the quick publication of high-quality papers in the field of biomolecular crystals, covering the crystallization, crystallographic research, conventional and nonconventional methods of crystal growth, and the characterization of crystals and crystalline samples.

The scope of this section includes classical methods of structural studies such as X-ray diffraction (single and crystalline powder) and cutting-edge methods such as cryo-electron microscopy (Cryo-EM), as well as those related to the diffraction of electrons, neutrons, and free-electron lasers (XFEL).

We encourage the submission of research articles, reviews, letters, and communications concerning all aspects related to biomolecular crystals from small-molecular-weight biocrystals to biological macromolecules (proteins, nucleic acids, polysaccharides, and membrane proteins).

Guest Editors

Dr. Blaine Mooers

Department of Biochemistry and Physiology, College of Medicine, University of Oklahoma Health Sciences, Oklahoma City, OK 73104-5419, USA

Prof. Dr. Jolanta Prywer

Institute of Physics, Lodz University of Technology, ul. Wólczańska 219, 93-005 Łódź, Poland

Deadline for manuscript submissions

closed (31 December 2023)

About the Journal

Message from the Editor-in-Chief

Welcome to *Crystals*, the journal dedicated to the fascinating world of crystallographic research! Crystals are more than mere decorative elements; they hold the key to understanding the fundamental structure of matter. Our mission is to explore the crucial significance of this research across various fields. From medicine to technology, chemistry to geology, crystals play a vital role. Their structure provides insights into new advanced materials, innovative drugs, and groundbreaking technologies. Through *Crystals*, we delve into the microscopic world to discover solutions that will shape the future. Join us on a journey through the *Crystals*, where science merges with beauty and innovation.

Editor-in-Chief

Prof. Dr. Alessandra Toncelli
Department of Physics, University of Pisa, 56126 Pisa, PI, Italy

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), Inspec, Ei Compendex, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Crystallography) / CiteScore - Q2 (Condensed Matter Physics)
