

Special Issue

Crystal Growth from Liquid Phase

Message from the Guest Editors

This Special Issue aims at publishing research findings from various perspectives on bulk crystal growth from the liquid phase. We encourage the submission of original articles in this field by means of numerical simulations and/or experimental approaches, including novel design of growth process, by considering external applied fields and new approaches. Moreover, reviews and feature articles are also welcome. Topics for this issue may include: ☒Transport phenomena occurring during growth of bulk crystals from the liquid phase; numerical and experimental; ☒Study and control of transport structures in the melt/solution under external fields; numerical and experimental; ☒Development and utilization of new growth processes and systems for bulk crystal growth.

Guest Editors

Prof. Dr. Yasunori Okano

Division of Chemical Engineering, Department of Materials Engineering Science, Graduate School of Engineering Science, Osaka University, Osaka 560-8531, Japan

Prof. Dr. Sadik Dost

Crystal Growth Laboratory, Department of Mechanical Engineering, University of Victoria, Victoria, BC, Canada

Deadline for manuscript submissions

closed (31 December 2021)

About the Journal

Message from the Editor-in-Chief

Welcome to *Crystals*, the journal dedicated to the fascinating world of crystallographic research! Crystals are more than mere decorative elements; they hold the key to understanding the fundamental structure of matter. Our mission is to explore the crucial significance of this research across various fields. From medicine to technology, chemistry to geology, crystals play a vital role. Their structure provides insights into new advanced materials, innovative drugs, and groundbreaking technologies. Through *Crystals*, we delve into the microscopic world to discover solutions that will shape the future. Join us on a journey through the *Crystals*, where science merges with beauty and innovation.

Editor-in-Chief

Prof. Dr. Alessandra Toncelli

Department of Physics, University of Pisa, 56126 Pisa, PI, Italy

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), Inspec, Ei Compendex, CAPus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Crystallography) / CiteScore - Q2 (Condensed Matter Physics)
