

Special Issue

Multiscale Mechanical Behavior of Metals

Message from the Guest Editor

We invite researchers to contribute to the Special Issue on “Multiscale Mechanical Behavior of Metals”. This Special Issue is intended to serve as a forum covering recent understandings of the mechanical behavior of metals at different scales. Potential topics include but are not limited to the mechanical behavior of:

- Low dimensionality metallic specimens such as nanowires, nano/micropillars, and thin films and surfaces;
- Nanocrystalline and -porous metals and alloys;
- Cellular structures;
- Advanced engineering metallic alloys.

About the Journal

Message from the Editor-in-Chief

Welcome to *Crystals*, the journal dedicated to the fascinating world of crystallographic research! Crystals are more than mere decorative elements; they hold the key to understanding the fundamental structure of matter. Our mission is to explore the crucial significance of this research across various fields. From medicine to technology, chemistry to geology, crystals play a vital role. Their structure provides insights into new advanced materials, innovative drugs, and groundbreaking technologies. Through *Crystals*, we delve into the microscopic world to discover solutions that will shape the future. Join us on a journey through the *Crystals*, where science merges with beauty and innovation.

Editor-in-Chief

Prof. Dr. Alessandra Toncelli

Department of Physics, University of Pisa, 56126 Pisa, PI, Italy

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), Inspec, Ei Compendex, CAPus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Crystallography) / CiteScore - Q2 (Condensed Matter Physics)
