

## Special Issue

# The Realm of Pharmaceutical Multicomponent Forms

### Message from the Guest Editors

The Special Issue on "The Realm of Pharmaceutical Multicomponent Forms" highlights the use of co-crystallization and the development of other multicomponent forms in the pharmaceutical context, as a tool to improve drug properties and consequently tackle specific drug problems. The aim of this Special Issue is to show how different multicomponent forms can improve drug properties and how they can be transposed to industrial settings. Therefore, works related to the development of all the abovementioned multicomponent forms are welcome in this Special Issue. Additionally, industrial applications of sustainable and greener co-crystallization methods are encouraged.

## About the Journal

### Message from the Editor-in-Chief

Welcome to *Crystals*, the journal dedicated to the fascinating world of crystallographic research! Crystals are more than mere decorative elements; they hold the key to understanding the fundamental structure of matter. Our mission is to explore the crucial significance of this research across various fields. From medicine to technology, chemistry to geology, crystals play a vital role. Their structure provides insights into new advanced materials, innovative drugs, and groundbreaking technologies. Through *Crystals*, we delve into the microscopic world to discover solutions that will shape the future. Join us on a journey through the *Crystals*, where science merges with beauty and innovation.

### Author Benefits

#### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), Inspec, Ei Compendex, CAPus / SciFinder, and other databases.

#### Journal Rank:

JCR - Q2 (Crystallography) / CiteScore - Q2 (Condensed Matter Physics)
