

Special Issue

Investigation of Nanostructures with X-ray Scattering Techniques

Message from the Guest Editors

We invite researchers studying nanostructures using scattering techniques, or developing such methods to contribute to the Special Issue, Investigation of Nanostructures with X-ray Scattering Techniques, which should serve as a forum to discuss the recent improvements and the state of the art in structural studies on nanostructures. The potential topics include, but are not limited to, the following: - structural properties of nanomaterials - strain determination in nanostructures - structure to property relationships - development of scattering techniques aimed at nanostructures - coherent diffraction applied to nanostructures

Guest Editors

Dr. Dominik Kriegner

Max Planck Institute for Chemical Physics of Solids Dresden, Germany

Dr. Milan Dopita

Department of Condensed Matter Physics, Faculty of Mathematics and Physics of Charles University, Prague, Czech Republic

Deadline for manuscript submissions

closed (15 June 2019)

About the Journal

Message from the Editor-in-Chief

Welcome to *Crystals*, the journal dedicated to the fascinating world of crystallographic research! Crystals are more than mere decorative elements; they hold the key to understanding the fundamental structure of matter. Our mission is to explore the crucial significance of this research across various fields. From medicine to technology, chemistry to geology, crystals play a vital role. Their structure provides insights into new advanced materials, innovative drugs, and groundbreaking technologies. Through *Crystals*, we delve into the microscopic world to discover solutions that will shape the future. Join us on a journey through the *Crystals*, where science merges with beauty and innovation.

Editor-in-Chief

Prof. Dr. Alessandra Toncelli

Department of Physics, University of Pisa, 56126 Pisa, PI, Italy

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), Inspec, Ei Compendex, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Crystallography) / CiteScore - Q2 (Condensed Matter Physics)
