

# Special Issue

## Pharmaceutical Crystals

### Message from the Guest Editors

The Special Issue on “Pharmaceutical Crystals” aims to publish novel molecular and crystal structures of pharmaceutical compounds. We especially encourage the submission of works of new crystal structures of APIs including polymorphs and solvate crystals, and of multi-component crystals of APIs including co-crystals and salts, which would be related to changes of the physicochemical properties of pharmaceutical crystals. This Special Issue demonstrates the importance of crystal structure information in many sectors of pharmaceutical science and engineering, and thus contributions from both industry and academia are welcome. We are delighted to invite you to submit an article to the “Pharmaceutical Crystals” Special Issue of *Crystals*.

## About the Journal

### Message from the Editor-in-Chief

Welcome to *Crystals*, the journal dedicated to the fascinating world of crystallographic research! Crystals are more than mere decorative elements; they hold the key to understanding the fundamental structure of matter. Our mission is to explore the crucial significance of this research across various fields. From medicine to technology, chemistry to geology, crystals play a vital role. Their structure provides insights into new advanced materials, innovative drugs, and groundbreaking technologies. Through *Crystals*, we delve into the microscopic world to discover solutions that will shape the future. Join us on a journey through the *Crystals*, where science merges with beauty and innovation.

### Author Benefits

#### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), Inspec, Ei Compendex, CAPlus / SciFinder, and other databases.

#### Journal Rank:

JCR - Q2 (Crystallography) / CiteScore - Q2 (Condensed Matter Physics)
