

# Special Issue

## Brain Health

### Message from the Guest Editors

Our brain plays a crucial role in all aspects of our lives; it is essential for cognitive, motor, and sensory functions, as well as our experiences, emotions, and behavior. In addition, it influences vascular, endocrine, and immunological processes in our body. Ultimately, the brain and its health are essential for our individual (physical, mental, social, and spiritual) wellbeing, for unlocking our potential (in terms of knowledge, skills, and creativity) as individuals, and for the sustainable development of a fair, well-functioning, and productive society. The “Brain Health” Special Issue is dedicated to not only advancing basic and translational knowledge, but also to fostering international collaborations and initiatives to promote brain health and science-based prevention of brain disorders throughout the life course for all people worldwide. We eagerly await your submissions to contribute to this crucial conversation about brain health.

## About the Journal

### Message from the Editor-in-Chief

You are invited to contribute a research article or a comprehensive review for consideration and publication in *Clinical and Translational Neuroscience* (ISSN 2514-183X). *Clinical and Translational Neuroscience* is an open access, peer-reviewed scientific journal that publishes original articles, critical reviews, case reports, and short communications on clinical and translational neuroscience. The scientific community and the general public can access the content free of charge as soon as it is published.

We would be pleased to welcome you as one of our authors.
