Message from the Guest Editors

Dear Colleagues,

Surgical treatment is a challenging option both for primary bone tumors of the spine and for spinal metastases.

Primary bone tumors of the spine are rare entities whose treatment algorithms are filled with nuances that are evolving constantly. For most malignant spinal bone tumors, surgery remains the cornerstone of treatment. Respecting oncologic principles has been associated with improved survival and decreased local recurrence in multiple settings. However, even in experienced centers, these surgeries carry a significant risk of adverse events and possible long-term neurologic impairment. The morbidity associated with these procedures and the challenges of local recurrence have encouraged the exploration of alternatives or adjuncts to surgical treatment.

Message from the Editor-in-Chief

I am honored and enthusiastic to serve as incoming Editor-in-Chief of *Current Oncology*. Since its establishment in 1994, *Current Oncology* has been playing an important role in the advancement of cancer care by disseminating new knowledge in the cancer care continuum. *Current Oncology* is affiliated with several key cancer societies and provides a global platform to share scientific progress in oncology. We strive for high standards and work together to maintain a rigorous and unbiased peer review process to publish high-quality articles. We have an outstanding editorial team which is committed to the success of *Current Oncology*.

Author Benefits

Open Access: free for readers, with **article processing charges (APC)** paid by authors or their institutions.

High Visibility: indexed within **Scopus, SCIE (Web of Science), PubMed, MEDLINE, PMC, Embase,** and **other databases.**

Journal Rank: JCR - Q2 (*Oncology*)
