Diagnosis of Solid and Hematological Tumours in the Era of Artificial Intelligence (AI)

Message from the Guest Editors

In recent years the diagnosis of solid and hematological neoplasms has begun to be invested by a renewed enthusiasm and desire for research towards the use of technology in a field that is difficult in itself, such as human neoplasms. The spread of ever more powerful instruments has made it possible to transform large amounts of data into information flows that could be the basis for the development and training of Artificial Intelligence algorithms. In this Special Issue we are confronted on a very current terrain and we invite colleagues from different disciplines to present their contribution.

About the Journal

Message from the Editor-in-Chief

I am honored and enthusiastic to serve as Editor-in-Chief of *Current Oncology*. Since its establishment in 1994, *Current Oncology* has been playing an important role in the advancement of cancer care by disseminating new knowledge in the cancer care continuum. *Current Oncology* is affiliated with several key cancer societies and provides a global platform to share scientific progress in oncology. We strive for high standards and work together to maintain a rigorous and unbiased peer review process to publish high-quality articles. We have an outstanding editorial team which is committed to the success of *Current Oncology*.

Editor-in-Chief

Prof. Dr. Shahid Ahmed
