BCMA-Directed CAR-T Therapy in Relapsed or Refractory Multiple Myeloma

Message from the Guest Editor

Relapsed or refractory multiple myeloma poses a significant challenge in hematology. BCMA-directed CAR-T therapy has emerged as a promising treatment approach in such cases. This specialized immunotherapy targets the B-cell maturation antigen (BCMA) expressed on myeloma cells, providing a targeted and potentially curative option. However, challenges such as cytokine release syndrome and neurotoxicity persist, requiring careful patient monitoring and management. This Special Issue will explore the latest advancements, outcomes, and challenges in BCMA-directed CAR-T therapy for multiple myeloma, facilitating a deeper understanding of its potential in transforming the landscape of myeloma treatment.

About the Journal

Message from the Editor-in-Chief

I am honored and enthusiastic to serve as Editor-in-Chief of *Current Oncology*. Since its establishment in 1994, *Current Oncology* has been playing an important role in the advancement of cancer care by disseminating new knowledge in the cancer care continuum. *Current Oncology* is affiliated with several key cancer societies and provides a global platform to share scientific progress in oncology. We strive for high standards and work together to maintain a rigorous and unbiased peer review process to publish high-quality articles. We have an outstanding editorial team which is committed to the success of *Current Oncology*.

Editor-in-Chief

Prof. Dr. Shahid Ahmed
