

Special Issue

Unveiling the Economic Impact of Cancer Treatment

Message from the Guest Editor

Advances in cancer detection and treatment have improved survival rates, but they come with rising financial burdens for patients, healthcare systems, and society. Financial toxicity—the adverse economic effects of cancer care—has emerged as a critical issue, even in countries with universal healthcare. Vulnerable populations face heightened risks, underscoring the need for research on cost-effective interventions, health equity, and policy solutions. This Special Issue explores the economics of cancer care, from prevention to survivorship and end-of-life care. Topics of interest include the following:

- Cost-effectiveness of screening, therapies, and care delivery models.
- Financial toxicity and its impact on patients, families, and caregivers.
- Structural and policy factors influencing affordability and access.
- Innovative strategies to mitigate economic disparities in cancer care.

We particularly encourage studies on emerging trends, such as value-based care models, real-world cost analyses, and global disparities in cancer expenditure. In addition, contributions may include economic evaluations, policy assessments, or interventions addressing financial hardship.

About the Journal

Message from the Editor-in-Chief

I am honored and enthusiastic to serve as Editor-in-Chief of *Current Oncology*. Since its establishment in 1994, *Current Oncology* has been playing an important role in the advancement of cancer care by disseminating new knowledge in the cancer care continuum. *Current Oncology* is affiliated with several key cancer societies and provides a global platform to share scientific progress in oncology. We strive for high standards and work together to maintain a rigorous and unbiased peer review process to publish high-quality articles. We have an outstanding editorial team which is committed to the success of *Current Oncology*.

Editor-in-Chief

Prof. Dr. Shahid Ahmed
