Recent Advances in Transplant Oncology

Message from the Guest Editors

The concept of transplant oncology is a new vision to utilize the experience of transplantation medicine and oncology to treat selected malignancies with restricted therapeutic options to improve survival by extending the limit of conventional treatments. The aggregate clinical experience has shown that many patients with these cancers achieve superior outcomes when treated with transplantation, as opposed to conventional resection and systemic therapy.

We invite you to contribute to this Special Issue, titled “Recent Advances in Transplant Oncology”. We are seeking submissions that will bring a better understanding of the implementation of transplant oncology algorithms at different centers and how the novel concepts of precision medicine are used. We also seek analyses of transplant policy in light of this new concept and the use of life donation for this purpose. We hope to provide more clarity on the specific management and mechanisms of these three cancers to improve oncological outcomes.

We look forward to your contributions.

About the Journal

Message from the Editor-in-Chief

I am honored and enthusiastic to serve as Editor-in-Chief of *Current Oncology*. Since its establishment in 1994, *Current Oncology* has been playing an important role in the advancement of cancer care by disseminating new knowledge in the cancer care continuum. *Current Oncology* is affiliated with several key cancer societies and provides a global platform to share scientific progress in oncology. We strive for high standards and work together to maintain a rigorous and unbiased peer review process to publish high-quality articles. We have an outstanding editorial team which is committed to the success of *Current Oncology*.

Editor-in-Chief

Prof. Dr. Shahid Ahmed
