Special Issue

Microsurgical Management of Chronic Cancer-Related Lymphedema

Message from the Guest Editors

Chronic cancer-related lymphedema is a debilitating complication affecting many cancer survivors, significantly impairing quality of life. Microsurgical techniques, such as lymphaticovenous anastomosis (LVA) and vascularized lymph node transfer (VLNT), have emerged as promising treatments to restore lymphatic drainage. However, their widespread adoption remains limited due to technical complexity, variability in long-term outcomes, and the need for specialized surgical expertise. This Special Issue focuses on advancing the microsurgical management of chronic cancer-related lymphedema.

About the Journal

Message from the Editor-in-Chief

I am honored and enthusiastic to serve as Editor-in-Chief of *Current Oncology*. Since its establishment in 1994, *Current Oncology* has been playing an important role in the advancement of cancer care by disseminating new knowledge in the cancer care continuum. *Current Oncology* is affiliated with several key cancer societies and provides a global platform to share scientific progress in oncology. We strive for high standards and work together to maintain a rigorous and unbiased peer review process to publish high-quality articles. We have an outstanding editorial team which is committed to the success of *Current Oncology*.

Editor-in-Chief

Prof. Dr. Shahid Ahmed

- College of Medicine, University of Saskatchewan, Saskatoon, SK S7N5E5, Canada
- 2. Saskatchewan Cancer Agency, Saskatoon Cancer Center, Saskatoon, SK S7N5H5, Canada

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, MEDLINE, PMC, Embase, and other databases.

Journal Rank:

JCR - Q2 (Oncology)
