Challenges in Management of Thoracic Malignancies in Patients with COPD

Message from the Guest Editors

☒Chronic obstructive pulmonary disease (COPD) poses a significant social burden, as it has a widespread effect on healthcare systems, the economy, and social welfare.

☒The complex interplay between COPD and thoracic malignancies, particularly lung cancer, is a subject of significant medical interest and concern. The treatment of COPD patients, especially those with malignancies, remains a formidable challenge. Also, COPD complicates the management of lung cancer and other thoracic malignancies, affecting diagnosis, treatment, and prognosis.

☒We invite potential contributors to submit their work on current challenges in treating COPD patients with lung cancer or secondary pulmonary malignancies. We are particularly interested in manuscripts addressing survival predictors, postoperative/postinterventional risk factors, and novel therapy strategies or regimens. Submissions may include original research articles, narrative reviews, and systematic reviews.

☒We look forward to receiving your valuable contributions.

About the Journal

Message from the Editor-in-Chief

I am honored and enthusiastic to serve as Editor-in-Chief of *Current Oncology*. Since its establishment in 1994, *Current Oncology* has been playing an important role in the advancement of cancer care by disseminating new knowledge in the cancer care continuum. *Current Oncology* is affiliated with several key cancer societies and provides a global platform to share scientific progress in oncology. We strive for high standards and work together to maintain a rigorous and unbiased peer review process to publish high-quality articles. We have an outstanding editorial team which is committed to the success of *Current Oncology*.

Editor-in-Chief

Prof. Dr. Shahid Ahmed
