Surgical Management of Patients with Hepatobiliary and Pancreatic Malignancies

Message from the Guest Editors

This Special Issue focuses on the surgical management of patients with hepatobiliary and pancreatic malignancies, addressing critical aspects such as surgical techniques, postoperative outcomes, and survival rates. It explores the latest advancements in surgical approaches for liver, bile duct, and pancreatic cancers, including innovations in minimally invasive surgery, liver transplantation, and complex resections. Additionally, this Special Issue highlights regional disparities in surgical practices and outcomes, examining how healthcare infrastructure, surgical expertise, and access to advanced treatments impact patient prognoses across different regions. It also delves into survival differences, with a focus on factors influencing long-term survival, recurrence rates, and the role of adjuvant therapies. By addressing these multifaceted topics, this Special Issue aims to provide a comprehensive overview of the current state of surgical management for hepatobiliary and pancreatic malignancies, offering insights into improving patient outcomes and reducing global disparities in care.

About the Journal

Message from the Editor-in-Chief

I am honored and enthusiastic to serve as Editor-in-Chief of *Current Oncology*. Since its establishment in 1994, *Current Oncology* has been playing an important role in the advancement of cancer care by disseminating new knowledge in the cancer care continuum. *Current Oncology* is affiliated with several key cancer societies and provides a global platform to share scientific progress in oncology. We strive for high standards and work together to maintain a rigorous and unbiased peer review process to publish high-quality articles. We have an outstanding editorial team which is committed to the success of *Current Oncology*.

Editor-in-Chief

Prof. Dr. Shahid Ahmed
