Editorial Board Members' Collection Series: Recent Advancements in Malignant Parotid Tumors

Message from the Guest Editors

Salivary gland malignancies are rare, heterogeneous, and diverse, constituting 1–3% of head–neck tumors. Clinical course varies according to a diverse range of histological and clinical behaviors, ranging from indolent, slow-growing adenoid cystic carcinoma to rapidly progressive, possibly fatal, salivary ductal carcinoma. In this Special Issue on “Editorial Board Members' Collection Series: Recent Advancements in Malignant Parotid Tumors”, we encourage original research or review articles on the wide range of topics related to parotid tumor, from epidemiology histology and genetic translocation to clinical management, including surgery and radiation therapy, chemotherapy, and novel therapeutics, such as molecular targeted therapies.

About the Journal

Message from the Editor-in-Chief

I am honored and enthusiastic to serve as Editor-in-Chief of *Current Oncology*. Since its establishment in 1994, *Current Oncology* has been playing an important role in the advancement of cancer care by disseminating new knowledge in the cancer care continuum. *Current Oncology* is affiliated with several key cancer societies and provides a global platform to share scientific progress in oncology. We strive for high standards and work together to maintain a rigorous and unbiased peer review process to publish high-quality articles. We have an outstanding editorial team which is committed to the success of *Current Oncology*.

Editor-in-Chief

Prof. Dr. Shahid Ahmed
