Cancer in Gestation

Message from the Guest Editor

Cancer during pregnancy is not commonly diagnosed, but it can happen. In fact, thousands of cancers occur during pregnancies each year in the United States and worldwide. During pregnancy, it can sometimes be hard to know if body changes derive from the pregnancy or from cancer. Because of these challenges, when cancer develops during a pregnancy, it is often diagnosed at a more advanced stage than it would be otherwise. We all know that treatment goals are the same as they would be if patients were not pregnant to cure the cancer if possible, or to control it and stop it from spreading. However, our treatment options will likely be more complicated because the treatment team will need to balance giving patients the best treatment for cancer while also considering the baby. Given the relevance of the subject, I warmly invite you to submit your contribution.

About the Journal

Message from the Editor-in-Chief

I am honored and enthusiastic to serve as Editor-in-Chief of *Current Oncology*. Since its establishment in 1994, *Current Oncology* has been playing an important role in the advancement of cancer care by disseminating new knowledge in the cancer care continuum. *Current Oncology* is affiliated with several key cancer societies and provides a global platform to share scientific progress in oncology. We strive for high standards and work together to maintain a rigorous and unbiased peer review process to publish high-quality articles. We have an outstanding editorial team which is committed to the success of *Current Oncology*.

Editor-in-Chief

Prof. Dr. Shahid Ahmed
