Palliative Care in Oncology: Current Advances

Message from the Guest Editors

Palliative care in oncology plays a vital role in improving the quality of life for patients facing a serious cancer diagnosis. It focuses on relieving pain and other distressing symptoms while also attending to the emotional, social, and spiritual dimensions of care. Unlike curative treatments, which are designed to eradicate cancer, palliative care centers on providing comfort, promoting well-being, and supporting patients and their families throughout their cancer treatment journey. With the increasing complexity of cancer treatment and the growing emphasis on the need for holistic care, palliative care has become an integral component of oncology. Not only does it improve the overall patient experience, it also helps manage the side effects of aggressive treatments such as chemotherapy and radiation. In addition, palliative care providers work closely with oncologists and other healthcare professionals to ensure that care is tailored to the individual patient's needs and preferences. This Special Issue focuses on the synergy between palliative care and anti-tumor treatment, and provides a scientific basis for clinical decision-making.

About the Journal

Message from the Editor-in-Chief

I am honored and enthusiastic to serve as Editor-in-Chief of *Current Oncology*. Since its establishment in 1994, *Current Oncology* has been playing an important role in the advancement of cancer care by disseminating new knowledge in the cancer care continuum. *Current Oncology* is affiliated with several key cancer societies and provides a global platform to share scientific progress in oncology. We strive for high standards and work together to maintain a rigorous and unbiased peer review process to publish high-quality articles. We have an outstanding editorial team which is committed to the success of *Current Oncology*.

Editor-in-Chief

Prof. Dr. Shahid Ahmed
