Routine Screening for Distress, Depression and Anxiety in Oncology: Where Are We Now?

Message from the Guest Editors

Psychological distress, depression and anxiety are prevalent among cancer patients, significantly impacting their quality of life, treatment adherence and overall outcomes. Despite growing recognition of the importance of routine screening for these conditions, implementation remains inconsistent across oncology practices. Barriers such as limited resources, the lack of standardized protocols and insufficient training for healthcare providers often hinder effective screening and intervention. This Special Issue aims to explore the current state of routine screening for distress, depression and anxiety in oncology settings.

About the Journal

Message from the Editor-in-Chief

I am honored and enthusiastic to serve as Editor-in-Chief of *Current Oncology*. Since its establishment in 1994, *Current Oncology* has been playing an important role in the advancement of cancer care by disseminating new knowledge in the cancer care continuum. *Current Oncology* is affiliated with several key cancer societies and provides a global platform to share scientific progress in oncology. We strive for high standards and work together to maintain a rigorous and unbiased peer review process to publish high-quality articles. We have an outstanding editorial team which is committed to the success of *Current Oncology*.

Editor-in-Chief

Prof. Dr. Shahid Ahmed
