Cancer Rehabilitation: Innovations in Practice & Enhancing Survivorship Care

Message from the Guest Editors

As cancer survival rates continue to improve, the importance of comprehensive rehabilitation strategies has never been more paramount. Our focus encompasses a wide array of topics, including, but not limited to, the development of rehabilitation care models, the management of impairments and disabilities, and strategies for effective symptom management in cancer survivors. We invite researchers to submit cutting-edge research that provides insights into improving the quality of life for cancer survivors through evidence-based rehabilitation practices. We are particularly interested in studies that explore novel interventions, assess the efficacy of rehabilitation programs, and address the multifaceted needs of cancer survivors or those living with advanced or metastatic disease. Additionally, we welcome submissions that examine the integration of rehabilitation services within healthcare systems and their impact on patient outcomes. We look forward to receiving your contributions.

About the Journal

Message from the Editor-in-Chief

I am honored and enthusiastic to serve as Editor-in-Chief of *Current Oncology*. Since its establishment in 1994, *Current Oncology* has been playing an important role in the advancement of cancer care by disseminating new knowledge in the cancer care continuum. *Current Oncology* is affiliated with several key cancer societies and provides a global platform to share scientific progress in oncology. We strive for high standards and work together to maintain a rigorous and unbiased peer review process to publish high-quality articles. We have an outstanding editorial team which is committed to the success of *Current Oncology*.

Editor-in-Chief

Prof. Dr. Shahid Ahmed
