Special Issue

Chronic Lymphocytic Leukemia: Therapy and Outcome

Message from the Guest Editor

In the last 15 years, our understanding of chronic lymphocytic leukemia has been revolutionized thanks to significant insights into the molecular biology of the disease and the interplay between neoplastic cells and the surrounding microenvironment. The identification of molecules which are pivotal to the survival of malignant cells has allowed us to develop targeted therapies (monoclonal antibodies, kinase inhibitors and BH3mimetics) that have become the cornerstone of chronic lymphocytic leukemia treatment. Despite these advances, the disease remains incurable and hypogammaglobulinemia, infections, and second primary malignancies still impinge upon patients' quality of life. For this Special Issue, we are pleased to invite you to submit original research articles and reviews on any aspect of chronic lymphocytic leukemia are welcome. Research areas may include (but are not limited to) diagnostic pitfall, prognostic factor, predictive factors, critical signaling pathways, comorbidities, targeted therapies, management of kinase inhibitors, Richter syndrome, supporting therapies, and quality of life. We look forward to receiving your contributions.

About the Journal

Message from the Editor-in-Chief

I am honored and enthusiastic to serve as Editor-in-Chief of *Current Oncology*. Since its establishment in 1994, *Current Oncology* has been playing an important role in the advancement of cancer care by disseminating new knowledge in the cancer care continuum. *Current Oncology* is affiliated with several key cancer societies and provides a global platform to share scientific progress in oncology. We strive for high standards and work together to maintain a rigorous and unbiased peer review process to publish high-quality articles. We have an outstanding editorial team which is committed to the success of *Current Oncology*.

Editor-in-Chief

Prof. Dr. Shahid Ahmed

- 2. Saskatchewan Cancer Agency, Saskatoon Cancer Center, Saskatoon, SK S7N5H5, Canada

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, MEDLINE, PMC, Embase, and other databases.

Journal Rank:

JCR - Q2 (Oncology)
