Clinical Management of Cervical Cancer

Message from the Guest Editor

I am pleased to announce the Special Issue of *Current Oncology*, titled *Clinical Management of Cervical Cancer*. Clinical treatments for cervical cancer have significantly evolved in recent years, to become more personalized, improve clinical outcomes and reduce treatment side effects. Radiological and pathological findings enhanced a shift to better characterization of the disease, while molecular biomarkers are being developed to guide treatment as well as surveillance. Although clinical treatment strategies might differ from one region to another, new data have emerged to support them. Considering surgical treatment of early-stage cervical cancers, de-escalation may now apply to the type of hysterectomy or nodal staging performed, while surgical routes should be chosen carefully. Regarding the management of metastatic or recurrent disease, immunotherapy now plays a key role. This Special Issue will highlight these clinical aspects.

Keywords: cervical cancer; surgical treatments; de-escalation; systemic treatments; immunotherapy; biomarkers; personalized treatment

About the Journal

Message from the Editor-in-Chief

I am honored and enthusiastic to serve as Editor-in-Chief of *Current Oncology*. Since its establishment in 1994, *Current Oncology* has been playing an important role in the advancement of cancer care by disseminating new knowledge in the cancer care continuum. *Current Oncology* is affiliated with several key cancer societies and provides a global platform to share scientific progress in oncology. We strive for high standards and work together to maintain a rigorous and unbiased peer review process to publish high-quality articles. We have an outstanding editorial team which is committed to the success of *Current Oncology*.

Editor-in-Chief

Prof. Dr. Shahid Ahmed
