Special Issue

Clinical Advances and Therapeutic Challenges in Small-Cell Lung Cancer and Rare Thoracic Cancers

Message from the Guest Editor

The clinical decision-making process for patients with rare tumors poses a significant challenge in oncology, particularly in defining individualized therapeutic strategies. Unlike common malignancies, the available evidence and literature on rare tumors are predominantly limited to case series, retrospective studies, and small phase II prospective trials. Randomized trials, which are usually the cornerstone of therapeutic paradigms, are frequently unavailable or constrained by a limited sample size and the heterogeneity of enrolled populations. Given this context, therapeutic decisions are largely based on physicians' experience, guidelines developed by expert panels, and extrapolations from available evidence derived from different disease settings. This Special Issue is dedicated to small-cell lung cancer and rare thoracic tumors, with a particular focus on epithelial thymic tumors, thoracic neuroendocrine neoplasms, and pleural mesothelioma. I look forward to receiving your contributions.

About the Journal

Message from the Editor-in-Chief

I am honored and enthusiastic to serve as Editor-in-Chief of *Current Oncology*. Since its establishment in 1994, *Current Oncology* has been playing an important role in the advancement of cancer care by disseminating new knowledge in the cancer care continuum. *Current Oncology* is affiliated with several key cancer societies and provides a global platform to share scientific progress in oncology. We strive for high standards and work together to maintain a rigorous and unbiased peer review process to publish high-quality articles. We have an outstanding editorial team which is committed to the success of *Current Oncology*.

Editor-in-Chief

Prof. Dr. Shahid Ahmed
