Quality of Life and Follow-Up Care Among AYA Cancer Survivors

Message from the Guest Editors

Adolescent and young adult (AYA) cancer survivors encounter unique challenges that significantly impact their quality of life, necessitating specialized follow-up care. This Special Issue aims to delve into these critical aspects within the realm of AYA cancer survivorship, striving to enhance the long-term well-being and outcomes of this vulnerable population. Medical professionals and researchers in adolescent and young adult oncology specializing in survivorship care are encouraged to submit their original research as well as review articles to the Special Issue of *Current Oncology* focusing on how late effects from cancer and its treatments can impact various aspects of quality of life, including cardiovascular, endocrine, brain and spinal cord, and psychosocial health. Research is also encouraged that examines the survivorship care needs of AYA survivors to address these late and long-term effects of cancer treatment, including patterns of healthcare utilization for primary, specialty, oncology, behavioral health, and supportive care services.

About the Journal

Message from the Editor-in-Chief

I am honored and enthusiastic to serve as Editor-in-Chief of *Current Oncology*. Since its establishment in 1994, *Current Oncology* has been playing an important role in the advancement of cancer care by disseminating new knowledge in the cancer care continuum. *Current Oncology* is affiliated with several key cancer societies and provides a global platform to share scientific progress in oncology. We strive for high standards and work together to maintain a rigorous and unbiased peer review process to publish high-quality articles. We have an outstanding editorial team which is committed to the success of *Current Oncology*.

Editor-in-Chief

Prof. Dr. Shahid Ahmed
