Recent Advancements in the Surgical Treatment of Brain Tumors

Message from the Guest Editor

The surgical treatment of brain tumors has been continuously refined. To enhance the safety and efficacy of surgery, our understanding of pathophysiology and the knowledge regarding recent advancements in imaging technology and surgical devices need to be updated and incorporated into surgical procedures. For this Special Issue, we welcome manuscripts focusing on recent advancements in the surgical resection of any type of brain tumors. The choice of suitable frameworks is quite flexible; for example, malignant/benign brain tumors, intraventricular tumors, skull base tumors, pediatric tumors, intraoperative monitoring, etc. We hope that this Special Issue will contribute to furthering understanding of the recent advancements and future perspectives regarding surgery for brain tumors.

About the Journal

Message from the Editor-in-Chief

I am honored and enthusiastic to serve as Editor-in-Chief of *Current Oncology*. Since its establishment in 1994, *Current Oncology* has been playing an important role in the advancement of cancer care by disseminating new knowledge in the cancer care continuum. *Current Oncology* is affiliated with several key cancer societies and provides a global platform to share scientific progress in oncology. We strive for high standards and work together to maintain a rigorous and unbiased peer review process to publish high-quality articles. We have an outstanding editorial team which is committed to the success of *Current Oncology*.

Editor-in-Chief

Prof. Dr. Shahid Ahmed
