Lifestyle Factors and Colorectal Cancer Prevention

Message from the Guest Editor

Colorectal cancer is a significant health concern worldwide. Lifestyle factors have a profound impact on its prevention. Dietary choices, physical activity levels, smoking habits, and alcohol consumption can all impact an individual's risk of developing colorectal cancer. Understanding how these lifestyle factors influence cancer onset and progression is crucial for effective prevention strategies. This Special Issue aims to explore the relationship between lifestyle choices and colorectal cancer risk, highlighting preventive measures that individuals can adopt to reduce their likelihood of developing this type of cancer. Original research articles and reviews focusing on lifestyle factors and colorectal cancer prevention are encouraged for submission. I look forward to receiving your contributions.

About the Journal

Message from the Editor-in-Chief

I am honored and enthusiastic to serve as Editor-in-Chief of *Current Oncology*. Since its establishment in 1994, *Current Oncology* has been playing an important role in the advancement of cancer care by disseminating new knowledge in the cancer care continuum. *Current Oncology* is affiliated with several key cancer societies and provides a global platform to share scientific progress in oncology. We strive for high standards and work together to maintain a rigorous and unbiased peer review process to publish high-quality articles. We have an outstanding editorial team which is committed to the success of *Current Oncology*.

Editor-in-Chief

Prof. Dr. Shahid Ahmed
