

Special Issue

Pediatric Oncology in the Iberic Peninsula, Caribe, and Latin America

Message from the Guest Editors

Cancer is a major health problem in pediatric ages, and its frequency and mortality rates are increasing worldwide, particularly in the Ibero-American region. Pediatric cancer presents significant challenges for this region, particularly Latin America, which struggles with limited resources to meet the health needs of its low- and middle-income populations. This Special Issue aims to address the hematological and solid neoplasms, from the epidemiological to their treatment options and quality of life, passing through its molecular biology, and how personalized medicine is changing the survival of Ibero-American children. Emphasis will also be put on the challenges and initiatives currently in place to overcome these obstacles.

About the Journal

Message from the Editor-in-Chief

I am honored and enthusiastic to serve as Editor-in-Chief of *Current Oncology*. Since its establishment in 1994, *Current Oncology* has been playing an important role in the advancement of cancer care by disseminating new knowledge in the cancer care continuum. *Current Oncology* is affiliated with several key cancer societies and provides a global platform to share scientific progress in oncology. We strive for high standards and work together to maintain a rigorous and unbiased peer review process to publish high-quality articles. We have an outstanding editorial team which is committed to the success of *Current Oncology*.

Editor-in-Chief

Prof. Dr. Shahid Ahmed
