Haematological Neoplasms: Diagnosis and Management

Message from the Guest Editors

The latest WHO Classification of Tumours of Haematopoietic and Lymphoid Tissues, 4th Edition, dates back to 2017, and there is a huge ongoing work for the new edition to be published within the coming years as part of the novel 5th Edition series. This work is focused on the analysis, discussion, and potential endorsement of the recent advances in the pathology and molecular biology of haematological neoplasms. We are pleased to invite you to submit your research works to this Special Issue, which aims to shape the current landscape of the diagnosis and management of haematological neoplasms of both myeloid and lymphoid origin by critically assessing the more recent technological advances in the recognition of novel pathological entities, the detection of prognostic and predictive biomarkers, and the application of precision medicine tools. Research areas may include (but are not limited to) ancillary techniques, the identification of prognostic/predictive biomarkers, issues in the diagnosis/differential diagnosis of challenging entities, and the current role of pathology in tailored therapy and precision medicine.

About the Journal

Message from the Editor-in-Chief

I am honored and enthusiastic to serve as Editor-in-Chief of *Current Oncology*. Since its establishment in 1994, *Current Oncology* has been playing an important role in the advancement of cancer care by disseminating new knowledge in the cancer care continuum. *Current Oncology* is affiliated with several key cancer societies and provides a global platform to share scientific progress in oncology. We strive for high standards and work together to maintain a rigorous and unbiased peer review process to publish high-quality articles. We have an outstanding editorial team which is committed to the success of *Current Oncology*.

Editor-in-Chief

Prof. Dr. Shahid Ahmed
