Improving Care for Older Adults with Cancer

Message from the Guest Editors

Dear colleagues, The number of older adults with cancer has grown significantly and, due to the aging population, will significantly increase further. Older adults have been underrepresented in clinical research, and this has resulted in less evidence on how to best treat and care for this population. For this Special Issue, we welcome any manuscript focusing on new research focusing on basic, clinical, and psychosocial research focusing on older adults with cancer and their caregiver. This Special Issue aims to summarize the latest evidence on providing care to this population.

About the Journal

Message from the Editor-in-Chief

I am honored and enthusiastic to serve as Editor-in-Chief of *Current Oncology*. Since its establishment in 1994, *Current Oncology* has been playing an important role in the advancement of cancer care by disseminating new knowledge in the cancer care continuum. *Current Oncology* is affiliated with several key cancer societies and provides a global platform to share scientific progress in oncology. We strive for high standards and work together to maintain a rigorous and unbiased peer review process to publish high-quality articles. We have an outstanding editorial team which is committed to the success of *Current Oncology*.

Editor-in-Chief
