The Mental Health and Well-Being of Oncology Providers

Message from the Guest Editor

The Covid-19 pandemic has highlighted the importance of acknowledging and addressing the mental health and well-being of healthcare professionals. Over the past 18 months, we have seen healthcare providers in Emergency Rooms and in Covid-19 wards burnout and experience severe emotional distress and trauma as a result of caring for sick and dying patients. Within the oncology field, which often requires the long-term care of severely ill patients, many of whom will die in our care, the topic of burnout has received a great deal of attention. However, less documented are other aspects of the mental health distress and emotional well-being of providers as a result of this difficult work. The aim of this Special Issue will be to focus on the topics that directly affect the well-being of oncology healthcare providers worldwide. This can include articles on resilience, sources of distress, grief and loss, coping strategies, compassion fatigue and compassion satisfaction, the second victim syndrome, vicarious traumatization, and intervention strategies to reduce distress and/or increase well-being. For further reading, please, visit the [Special Issue](#) website

About the Journal

Message from the Editor-in-Chief

I am honored and enthusiastic to serve as Editor-in-Chief of *Current Oncology*. Since its establishment in 1994, *Current Oncology* has been playing an important role in the advancement of cancer care by disseminating new knowledge in the cancer care continuum. *Current Oncology* is affiliated with several key cancer societies and provides a global platform to share scientific progress in oncology. We strive for high standards and work together to maintain a rigorous and unbiased peer review process to publish high-quality articles. We have an outstanding editorial team which is committed to the success of *Current Oncology*.

Editor-in-Chief

Prof. Dr. Shahid Ahmed
