

Special Issue

Infectious Diseases in Dairy Animals

Message from the Guest Editors

Infectious diseases are important challenges in all settings, although with varying impact on production, societal economy, and farmers' livelihoods. These infections can directly (e.g., by mastitis, high fever, and painful mammary gland lesions in lactating animals) or indirectly affect milk production, by inducing fertility problems, morbidity, and mortality of recruitment animals, among others. In addition, some pathogens can be transmitted to humans, either by direct contact with animals or by consuming food products, and are important threats to public health. This Special Issue will welcome scientific contributions in the field of infectious diseases (caused by viruses, bacteria, parasites, fungi, and prions) in dairy animals, including, but not limited to, infection epidemiology, diagnostics, pathogen-host interactions, prevention, treatment, and socioeconomic impact of infectious diseases.

Keywords viral diseases bacterial diseases parasitic diseases mycosis prion diseases transboundary animal diseases zoonosis animal health

About the Journal

Message from the Editor-in-Chief

Dairy (ISSN 2624-862X) is an international, peer-reviewed open access advanced forum for studies related to the advances in dairy science. It publishes reviews, regular research papers and short communications. Our aim is to encourage scientists to publish their experimental and theoretical results in as much detail as possible. There is no restriction on the maximum length of the papers. The full experimental details must be provided so that the results can be reproduced.

Editor-in-Chief

Prof. Dr. Burim Ametaj
Department of Agriculture, Food and Nutritional Science, Faculty of
Agricultural, Life and Environmental Sciences, University of Alberta,
Edmonton, AB T6G 2R3, Canada

Author Benefits

High Visibility:

indexed within ESCI (Web of Science), Scopus, FSTA, and other databases.

Journal Rank:

JCR - Q1 (Agriculture, Dairy and Animal Science) /
CiteScore - Q1 (Veterinary (miscellaneous))

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 26.6 days after submission; acceptance to publication is undertaken in 5.6 days (median values for papers published in this journal in the second half of 2025).
