Special Issue

Innovation Meets Tradition in the Sheep and Goat Dairy Industry

Message from the Guest Editors

The domestic sheep (Ovis aries) and goat (Capra aegagrus hircus) are small ruminant species widely distributed throughout the world. They are raised in intensive or extensive production systems, usually on a smallholder farming system basis. Sheep and goat dairy products play an important economic role in many countries, particularly in the Mediterranean region, being closely linked to the culture and traditions of vast areas. Today, traditional ovine and caprine dairy production chains, from farmers to exporters, are facing the challenges of innovation, sustainability, safety, and productivity, while at the same time protecting each product's individual characteristics. This Special Issue will welcome scientific contributions in the field of ovine and caprine dairy production with ground-breaking perspectives and approaches, from physical-chemistry studies on milk and dairy, to new feeding strategies, herd management, nutritional quality, animal welfare, sustainability, and omics studies.

About the Journal

Message from the Editor-in-Chief

Dairy (ISSN 2624-862X) is an international, peerreviewed open access advanced forum for studies related to the

advances in dairy science. It publishes reviews, regular research papers and short communications. Our aim is to encourage scientists to publish their experimental and theoretical results in as much detail as possible. There is no restriction on the maximum length of the papers. The full experimental details must be provided so that the results can be reproduced.

Editor-in-Chief

Prof. Dr. Burim Ametaj

Department of Agriculture, Food and Nutritional Science, Faculty of Agricultural, Life and Environmental Sciences, University of Alberta, Edmonton, AB T6G 2R3, Canada

Author Benefits

High Visibility:

indexed within ESCI (Web of Science), Scopus, FSTA, and other databases.

Journal Rank:

JCR - Q1 (Agriculture, Dairy and Animal Science) / CiteScore - Q1 (Agricultural and Biological Sciences (miscellaneous))

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 23.4 days after submission; acceptance to publication is undertaken in 2.4 days (median values for papers published in this journal in the first half of 2025).
