

## Special Issue

# New Approaches to Sheep and Goat Milk Cheese: Biochemical, Sensory and Nutritional Characteristics

### Message from the Guest Editors

The aim of this Special Issue is to understand the ripening process of sheep milk cheeses and to study the factors that determine the ripening course.

Technological and genetic variables (ripening time, starters, pasteurization, sheep breed) can affect the sensory properties and quality of these cheeses. This Special Issue will welcome scientific contributions to understanding the changes experienced by the main chemical, biochemical, microbiological, and sensory parameters during the ripening of sheep milk cheeses. Variables that influence the ripening process of these cheeses and the strategies to improve their nutritional quality are also of interest. **Keywords**

- cheese
- sheep
- ripening
- breed
- starters
- flavor
- texture
- technological strategies
- nutritional composition
- sensory properties

## About the Journal

### Message from the Editor-in-Chief

*Dairy* (ISSN 2624-862X) is an international, peer-reviewed open access advanced forum for studies related to the advances in dairy science. It publishes reviews, regular research papers and short communications. Our aim is to encourage scientists to publish their experimental and theoretical results in as much detail as possible. There is no restriction on the maximum length of the papers. The full experimental details must be provided so that the results can be reproduced.

### Author Benefits

#### High Visibility:

indexed within ESCI (Web of Science), Scopus, FSTA, and other databases.

#### Journal Rank:

JCR - Q1 (Agriculture, Dairy and Animal Science) /  
CiteScore - Q1 (Agricultural and Biological Sciences  
(miscellaneous))

#### Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 23.4 days after submission; acceptance to publication is undertaken in 2.4 days (median values for papers published in this journal in the first half of 2025).
