Special Issue

Transition Cow Health and Management—Current Challenges and Future Solutions

Message from the Guest Editors

Periparturient diseases most commonly occur concurrently or consequently. Does this mean that periparturient diseases are symptoms of a syndrome, or is this just happening coincidentally? Could it be that one disease is increasing the susceptibility of the cows to other diseases? These questions make the periparturient period a very interesting area of research and an open field for intensive research. Given the importance of the transition period to the health of dairy cows, Dairy recently organized a Special Issue. The articles that will be published address topics including the role of mycotoxins on the health of transition dairy cows, the mammary gland microbiome, lessons learned from the application of metabolomics in ketosis, mastitis, lameness, as well as new insights into cow adaptation to new lactation. The discussion will also include the future of the dairy sector in the European Union Atlantic area.

We would like to invite the researchers that have been working in this area of research to submit data from their research works or review articles to be published of this Special Issue.

About the Journal

Message from the Editor-in-Chief

Dairy (ISSN 2624-862X) is an international, peerreviewed open access advanced forum for studies related to the

advances in dairy science. It publishes reviews, regular research papers and short communications. Our aim is to encourage scientists to publish their experimental and theoretical results in as much detail as possible. There is no restriction on the maximum length of the papers. The full experimental details must be provided so that the results can be reproduced.

Author Benefits

High Visibility:

indexed within ESCI (Web of Science), Scopus, FSTA, and other databases.

Journal Rank:

JCR - Q1 (Agriculture, Dairy and Animal Science) / CiteScore - Q1 (Agricultural and Biological Sciences (miscellaneous))

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 23.4 days after submission; acceptance to publication is undertaken in 2.4 days (median values for papers published in this journal in the first half of 2025).
