closed (1 March 2021)

Message from the Guest Editors

After the success of the first four editions of this workshop, co-located with the IEEE Big Data 2016, 2017, 2018, and 2019, we are pleased to organize the 5th Workshop on Real-time Stream Analytics, Stream Mining, CER/CEP, and Stream Data Management in Big Data (<https://workshop.euranova.eu/>). The authors of accepted papers will have the opportunity to publish an extended version in the *Data* Special Issue.

We invite researchers in this field to submit papers studying scalable online learning, incremental learning on stream processing infrastructures, complex event processing, and composite event recognition. We also encourage submissions on data stream management, data architecture using stream processing, and Internet of Things (IoT) data streaming. Additionally, we appreciate submissions studying the usage of stream processing in new innovative architectures.

Message from the Editor-in-Chief

Data is an open access journal that publishes scientific data in a reliable, citable, and accountable manner. Data grants the opportunity to formally share valuable data, for academic credit. It covers a wide range of disciplines in which data is generated so that published data is discoverable and available for wider re-use. The journal has highly accomplished scientists from a variety of disciplines on the editorial board. The publication emphasizes clarity, honesty, quality, and novelty and has a rigorous peer-review process. We strongly encourage you to share your data vision in Data.

Author Benefits

Open Access:— free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, ESCI (Web of Science), dblp, Inspec, RePEc, and other databases.

Journal Rank: CiteScore - Q2 (*Information Systems and Management*)
