

Special Issue

From Intuition to Algorithms: Re-Inventing Management in the Age of Big Data

Message from the Guest Editor

The rapid advancement of big data technologies and data-intensive methodologies is fundamentally transforming management and decision-making processes across private, public, and hybrid organizations. Managerial practices are increasingly evolving from experience-based intuition toward algorithmic, data-driven, and evidence-based approaches, driven by the growing availability of large-scale, heterogeneous, and high-velocity datasets. This Special Issue aims to provide an international scholarly platform for high-quality research focusing on datasets, data-driven methodologies, and data-related processes that support modern management, strategic decision-making, and organizational governance. In line with the journal *Data*, the emphasis is placed on the description, collection, processing, analysis, management, and application of research and experimental data in managerial and organizational contexts.

Guest Editor

Dr. Otmane Azeroual

About the Journal

Message from the Editor-in-Chief

Data is an open access journal that publishes scientific data in a reliable, citable, and accountable manner. Data grants the opportunity to formally share valuable data, for academic credit. It covers a wide range of disciplines in which data is generated so that published data is discoverable and available for wider re-use. The journal has highly accomplished scientists from a variety of disciplines on the editorial board. The publication emphasizes clarity, honesty, quality, and novelty and has a rigorous peer-review process. We strongly encourage you to share your data vision in Data.

Editor-in-Chief

Prof. Dr. Jamal Jokar Arsanjani

Geographic Information Science, Department of Planning and Development, Aalborg University Copenhagen, A.C. Meyers Vænge 15, DK-2450 Copenhagen, Denmark

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, ESCI (Web of Science), Ei Compendex, dblp, Inspec, RePEc, and other databases.

Journal Rank:

JCR - Q2 (Multidisciplinary Sciences) / CiteScore - Q2 (Information Systems and Management)
