Message from the Guest Editor

In dentistry, the term adhesion is often used to define the process that establishes the micromechanical union between the materials and dental substrates. A large number of clinical dental procedures are intermediated by adhesive systems. The practitioner must be able, not only to use materials available on the market, but also understand the mechanism of action of each of them, so that this knowledge is able to guide the choice of the adhesive system for each particular clinical case.

Effective and lasting adhesive interfaces are fully related to the interruption of the repetitive restorative cycle, in which restorations are periodically replaced by more complex and larger ones. Thus, the choice of the adhesive system must be based in deep knowledge of the material, as well as the characteristics of the dental tissues and their interaction with adhesive systems.

This Special Issue is interested in all aspects of adhesive systems, understanding their mechanisms of action and their interactions with the dental substrate. In addition, strategies to reduce degradation of the adhesive interface are very welcome with the objective of increasing the durability of adhesive interfaces.

an Open Access Journal by MDPI

Editor-in-Chief

Prof. Dr. Dr. Claude Jaquiéry

Department of Cranio—
Maxillofacial Surgery and
Hightech Research Center of CMF
—Surgery, University Hospital
Basel, Spitalstrasse 21, CH-4031
Basel, Switzerland

Message from the Editor-in-Chief

The *Dentistry Journal* (ISSN 2304-6767) is an official, peer-reviewed publication of MDPI, which transmits original papers as well as review articles from the entire field of dentistry to the scientific community. The *Dentistry Journal* supports scientific innovations, and clinical and experimental research within the whole field of dentistry and its related areas. The *Dentistry Journal* in particular supports interdisciplinary and translational studies. The *Dentistry Journal* provides a unique opportunity to contribute high quality articles and to take advantage of its large readership.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High visibility: Citations available in PubMed, full-text archived in PubMed Central. Indexed in Scopus from Vol. 6 (2018).

Rapid publication: manuscripts are peer-reviewed and a first decision provided to authors approximately 23.9 days after submission; acceptance to publication is undertaken in 13.9 days (median values for papers published in this journal in the first half of 2019).
