Message from the Guest Editor

New Frontiers in orthodontics aims to express the ongoing debate in orthodontics. Orthodontics is a dentistry area in continuous evolution, which draws from the most recent technological innovations, as well as from the most accredited scientific reports and practical experience, the basis for updating knowledge in the field. This Special Issue provides a comprehensive view of the state-of-art in orthodontics, outlined by research experts from different countries, to clarify emerging directions in the orthodontic field.

The present Special Issue covers a variety of topics, including technological innovations, orthodontic materials, the management of malocclusion and temporomandibular disorders, the epidemiology and risk factors in orthodontics, the preventive approach to malocclusions and temporomandibular disorders, and the differences between growing and adult patients.

Keywords: orthodontic appliances; orthodontic treatment; interceptive orthodontics; temporomandibular joint disorders
