Message from the Guest Editors

The wider contribution of children's oral health to their overall wellbeing is increasingly being acknowledged. Clinicians, public health practitioners and researchers are therefore increasingly interested in the psychosocial impacts of various dental conditions and how interventions may affect a child's oral health-related quality of life. Children are eloquent and insightful in describing the social, emotional or functional impacts of their dental condition and treatment experiences, providing they are engaged in a suitably child-centred approach. Indeed, over the last decade or so, it has been encouraging to observe the emergence of novel ways of involving children in oral health research, to ensure that their opinions are listened to and valued. Consequently, we now have a much greater understanding of what it means to a child (and indeed their family) to have a dental condition such as caries, enamel defects or trauma.

Potential topics include, but are not limited to, the following research areas:

- Pediatric dentistry
- Psychosocial impacts
- Oral health-related quality of life
- Dental conditions
- Caries
- Enamel defects
- Traumatic dental injury
- Child

an Open Access Journal by MDPI

Editor-in-Chief

Prof. Dr. Claude Jaquiéry

Department for Cranio-Maxillo-Facial Surgery, University Hospital Basel, Spitalstrasse 21, CH-4031 Basel, Switzerland

Message from the Editor-in-Chief

The *Dentistry Journal* (ISSN 2304-6767) is an official, peer-reviewed publication of MDPI, which transmits original papers as well as review articles from the entire field of dentistry to the scientific community. The *Dentistry Journal* supports scientific innovations, and clinical and experimental research within the whole field of dentistry and its related areas. The *Dentistry Journal* in particular supports interdisciplinary and translational studies. The *Dentistry Journal* provides a unique opportunity to contribute high quality articles and to take advantage of its large readership.

Author Benefits

Open Access: free for readers, with **article processing charges (APC)** paid by authors or their institutions.

High Visibility: indexed within **Scopus**, **ESCI (Web of Science)**, **PubMed**, **PMC**, and **other databases**.

Journal Rank: CiteScore - Q2 (*General Dentistry*)
