

## Special Issue

# Current Research and Clinical Practice in Digital Orthodontics

### Message from the Guest Editor

Digital technologies play a decisive role in orthodontics. They enable less invasive procedures, seamless communication and data exchange between dental disciplines, innovative developments in treatment planning and therapeutic approaches, and contribute to making treatment processes more efficient. We focus on current research and advances in digital technologies and imaging, such as integrating AI-driven diagnostics, MRI radiation-free visualization of anatomic structures, and personalized treatment strategies in orthodontics, including skeletal anchorage, aligner therapy, and orthognathic surgery. We also look for orthodontic accelerators and orthodontic screening tests that support and accelerate clinical translation. Research articles, review articles, and other papers are invited and welcome.

### Guest Editor

Prof. Dr. Britta A. Jung

Department of Orthodontics, University Medical Center Freiburg,  
University of Freiburg, Freiburg, Germany

### Deadline for manuscript submissions

20 September 2026

## About the Journal

### Message from the Editor-in-Chief

The *Dentistry Journal* (ISSN 2304-6767) is an official, peer-reviewed publication of MDPI, which transmits original papers as well as review articles from the entire field of dentistry to the scientific community. The *Dentistry Journal* supports scientific innovations, and clinical and experimental research within the whole field of dentistry and its related areas. The *Dentistry Journal* in particular supports interdisciplinary and translational studies. The *Dentistry Journal* provides a unique opportunity to contribute high quality articles and to take advantage of its large readership.
