

Special Issue

New Endodontic Materials

Message from the Guest Editor

Endodontics is becoming minimally invasive. Maximum respect for the original dental tissues influences the development of new clinical protocols and instruments. However, appropriate shaping, complete disinfection, and tridimensional filling of the root canal system are still essential. All new technologies are focused on the maintenance of the tooth structure and the regrowth of new biological tissues through regenerative endodontic procedures (REPs). At the same time, research is focused on a general simplification of the operative procedures, improving the patient experience, and long-term clinical outcomes. Both researchers and clinicians should share their experience and know the real potential of the new endodontic technologies. The present Special Issue will provide a scientific update of the new endodontic materials, clinical protocols, applications, and outcomes. The topics are focused on modern materials and techniques proposed for shaping, disinfection, and filling, as well as vital pulp therapy and regenerative procedures. Endodontics is changing and new technologies are leading this change.

About the Journal

Message from the Editor-in-Chief

The *Dentistry Journal* (ISSN 2304-6767) is an official, peer-reviewed publication of MDPI, which transmits original papers as well as review articles from the entire field of dentistry to the scientific community. The *Dentistry Journal* supports scientific innovations, and clinical and experimental research within the whole field of dentistry and its related areas. The *Dentistry Journal* in particular supports interdisciplinary and translational studies. The *Dentistry Journal* provides a unique opportunity to contribute high quality articles and to take advantage of its large readership.

Editor-in-Chief

Prof. Dr. Claude Jaquiéry

Department for Cranio-Maxillo-Facial Surgery, University Hospital
Basel, Spitalstrasse 21, CH-4031 Basel, Switzerland

Author Benefits

High Visibility:

indexed within Scopus, ESCI (Web of Science), PubMed, PMC, and other databases.

Journal Rank:

JCR - Q1 (Dentistry, Oral Surgery and Medicine) / CiteScore
- Q2 (General Dentistry)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 21.5 days after submission; acceptance to publication is undertaken in 3.5 days (median values for papers published in this journal in the first half of 2025).
